a/ ArCa classic card in case of any volume

b/ In case of AMD 300,000 /equivalent foreign currency/ and above amounts - plastic cards of Master Cardstandard, Master Card Gold, VISA classic, VISA Gold type.

## "CLASSIC" TERM DEPOSIT

\*\* The annual percentage yield on monthly, quarterly paid deposits denominated in AMD, USD, RUR and EUR is calculated based on the procedure stated by the Central Bank of RA with the following formula.

$$APY = (1 + r / n)^n - 1$$

where:

- 1) APY – annual percentage yield
- 2) r – annual simple interest rate
- 3) n – periodicity of interest capitalization in a year

\*\* The annual percentage yield on deposits in AMD, USD, EUR and RUB (interest paid upon the end of the tenor) is calculated based on the following formula.

$$A = \sum_{n=1}^N \frac{K_n}{(1+APY)^{\frac{Dn}{365}}}$$

where:

- 1) A - initial amount of deposit
- 2) n - current number of deposit cash flows
- 3) N - last number of deposit cash flow (including the cash flow on the deposit placement day), which denotes the expiry of the deposit agreement
- 4)  $K_n$  - flow of mandatory payments at the moment of deposit placement and/or cash flows of the deposit placed during the validity of deposit and/or mandatory flows of capitalized interest amount
- 5)  $D_n$  – number of days passed since the deposit placement, including the regular "n" deposit cash flow. If cash flow is invested at the moment of placing deposit,  $D_1=0$
- 6) Maximum value of each range of attraction period is taken into consideration for the term of deposit

***"NOTE: INTERESTS ON YOUR DEPOSIT ARE CALCULATED BASED ON THE NOMINAL INTEREST RATE AND THE ANNUAL PERCENTAGE YIELD SHOWS THE INCOME YOU WOULD HAVE RECEIVED, IF YOU WOULD HAVE MADE THE MANDATORY PAYMENTS TO THE INTEREST AND RECEIVED THE ACCRUED INTEREST AMOUNTS AT DEFINED PERIODICITY. YOU WILL FIND THE ORDER OF CALCULATING THE ANNUAL PERCENTAGE YIELD ON [www.aeb.am](http://www.aeb.am)".***

1. Classic deposit type- term deposit.
2. The deposit is placed for a minimum period of minimum 31 and a maximum of 1095 days.
3. Accrued interests aren't capitalized and are paid to the depositor once a month, quarterly or at the end of deposit agreement period.
4. Interests are calculated based on the balance of placed deposit amount. The calculation is made based on the actual number of days in a year: 365 days, and 366 days for a leap year.
5. Interest amounts shall accrue from the day the Deposit is placed with the Bank to the day preceding the date of its repayment to the Depositor.
6. Should the Depositor request repayment of the Deposit or a part thereof before the term of the Deposit expires, instead of the interest amounts set by this Agreement interest on the Deposit or a part thereof is calculated at 0% annual interest rate, and should the interest amounts be already paid to the Depositor, the Deposit shall be deemed repaid in the amount of interests accrued paid to the Depositor.
7. Should the deposit or any part thereof be demanded during the prolonged period of the Classic deposit Agreement, the interest envisaged by the Deposit Agreement shall be paid for previous period(s) and for the given period interest for the deposit or any part thereof shall be calculated and paid as per the provisions of article 5.
8. Should the Depositor fail to receive interests accrued to on the Deposit no further interests shall accrue thereon.
9. In case the deposit is not demanded on the date the term of the deposit expires (unless other term for the repayment of the deposit has been set by mutual agreement of the Parties) at the Depositor's choice, the Deposit repayment term can be automatically prolonged for the previous period (continually, but no more than 3 times) and interests shall be accrued against the Deposit under the terms existing in the Bank for the given deposit type at the date of prolongation.

## "CLASSIC" TERM DEPOSIT

Should the bank terminate the given deposit type, the deposit repayment term isn't automatically prolonged and until it is actually demanded the interests on the deposit are calculated at the rates set by the bank for the monetary funds available on acting bank accounts.

10. The Depositor can add additional amounts to the deposit (against which interests set forth by the Agreement shall accrue) in the following cases:

10.1 If the deposit is invested (extended for that period) with the condition of returning the deposit within 274 days or more, only up to the 180th day before the (extended) return date of the deposit and not more than the amount of the remaining amount of the deposit at the time of investment (extension).

10.2. No amounts can be added to the Deposit in case the deposit is placed for a term less than 274 days and in case of extension under such a condition, the amounts can be added only on prolongation day and shall not exceed the Deposit balance.

11. In the case of an early withdrawal request of the deposit or part thereof after an deposit increase, the earlier deposited amounts are returned first (the initially placed deposit amount, followed by the subsequent additions in sequence). Interest is calculated for the early withdrawn deposit or a part thereof in accordance with the provisions of clause 6.

12. The Bank cannot unilaterally decrease the interests specified in the Agreement provided that the deposit is repaid within the term set forth by the Agreement.

13. Should the Deposit not be demanded after the expiry of the term of the Agreement, and should the Deposit repayment period not be extended, until the deposit is being actually demanded the interests on the deposit will be calculated at the rates set forth by the Bank for the monetary means available on bank accounts.

14. The bank shall provide the Investor (Depositor) with a statement on their deposit account at the periodicity specified in the Agreement, which should not exceed a month, through the method of communication specified in the Deposit Agreement or in the Depositor's application with the exception of cases when over the accounting period the account has not been debited or credited, moreover, to provide an account statement within 5 days after such a request has been submitted by the depositor at the Tariffs set by the bank.
